

Keep your dies clean & Your team safe

The Safest and most Efficient system for maintaining and storing stamping dies.

Safety
**DIE
STORAGE
BLOCK**

A Better Safer Way!

With our die storage blocks, hands no longer need to be reached under the heavy tooling. Placement is done above the tooling, helping keep your extremities clear of the crushing danger.

www.DieStorageBlocks.com

Safety Die Storage Blocks are the safest and most efficient means of placing stamping die tooling. Our patent pending designs help to eliminate the possibility of accidental crushing of hands and feet. The spring loaded handle mechanism quickly and securely mounts the Die Storage Blocks to the tooling. This allows the dies to be moved around with the blocks attached. The tooling can then be placed onto storage racks or the floor without the need for employees searching for wood blocks of equal height. All the handling of the blocks are done above the tooling, helping to eliminate any injuries. Safety Die Storage Blocks are made in the USA.

**NO Reaching
under Tooling**

LOAD LIMIT 30 TONS EACH

↑ Fits STANDARD
Mounting Bolt Slot Height
2" - 3"
↓ 1"-2" option available*

Key Specs

- Load Limit 30 tons each
- raises height off floor 3"
- Designed for use on 2" to 3" thick clamp surfaces
- Slot width needs to be Minimum 1-1/16" wide
- Base is 4" diameter
- Powder coated in high visibility OSHA yellow
- weight 7.75 lbs each
- Made in USA
- Patents pending in US & International

Dies stay clean, while your team constructs, maintains, and stores your tooling; even in the most demanding environments.

Make your facility safer, cleaner and more efficient.

- No more searching for boards or matching sized wood blocks to put under your dies.
- No more tripping over unsightly and out of place scrap wood on your floor.
- And No more wasting time wiping dies clean of dirt, slugs, and steel chips they've collected from the floor or rotting old boards.
